Aluminum Window Profile

Because sliding aluminium window is aesthetic, corrosion resistant, windproof, waterproof and environmentally friendly, it is increasingly popular with users all around the world. Common sliding aluminum window includes sliding glass window, sliding back window, automatic sliding window, sliding storm window, interior sliding window, and more. The production of these windows all involves aluminum window profiles.

We are a China-based aluminum window profile manufacturer, founded in 1997. In order to improve the impact resistance and corrosion resistance of our products, we constantly introduce advanced processing equipment and detection facilities from Germany, Switzerland and France. Today, our aluminium window profiles are used extensively in various residential buildings and commercial buildings.
