

[Channel Aluminum Extrusion](#)

Channel Aluminum Extrusion

Thanks for your interest in our channel aluminum extrusion, which features a square U-shape, defined sharp edges and is suitable for lightweight structural and decorative applications. As a specialized channel aluminum extrusion manufacturer in China, we at Hentec have over ten years of production experience and can offer a wide array of aluminum channels.

Our channel aluminum extrusions are available in various specifications. Their thickness, height and width are respectively 1-3mm, 5.5-50mm and 8-46.9 mm. For your special specifications, please send us your samples or drawings, and we will customize our aluminum extrusions.

Surface treatment: mill finish, anodizing, electrophoresis, powder coating etc.

Aluminium alloy: 6063-T5,6063-T6,6061-T6,6005-T5 etc.

Extrusion equipment: 660~4000Ton

In order to ensure our customers find the product they require, we have made continuous efforts to expand our product lines since our very beginning. Now we offer customers an extensive line of products, like channel aluminum extrusion, aluminum window profile and curtain wall aluminum profile. As our aluminium products are aesthetically pleasing, corrosion resistant and environmentally friendly, they are highly sought after by customers from the USA, Russia, Canada, Germany, Dubai, South Africa, Brazil, Vietnam, etc.

Our company is located in Jiangyin, Jiangsu Province, near the port city Shanghai and the Yangtze River. Here we have easy access to convenient air, land and water transportation. Hence, our customers save on the freight charges of their purchases.

If you are interested in our aluminium extrusions or profiles, please contact us by telephone or email.
